Experience OUR[®] Technology

Optimizing the Utilization of Resources

OUR[®] Technology

The cost-effective approach to industrial
SUSTAINABILITY

What We Do

CPL's services focus on the optimization of thermal process performance, reducing your company's energy needs and increasing your sustainability.

Energy Process Optimization

Burner Management Systems

Combustion Control Systems

Low NOx Burner Technology

Emissions Reduction Optimization

Advanced Process Controls

Biomass Energy Systems

Combustion Conversions for Alternative Fuels

Process Heat Recovery

Operations and Maintenance of Alternative Fuel Systems

Renewable Fuel Processing

Combined Heat and Power Technology

Advanced Engineering Evaluations

3D Modeling

Component Engineering/Fabrication

Engineered Catalysts for Engines

Higher Efficiency

Since 1995, CPL has provided our customers with complete process and energy system solutions. Our professionals have over a century of combined experience in the

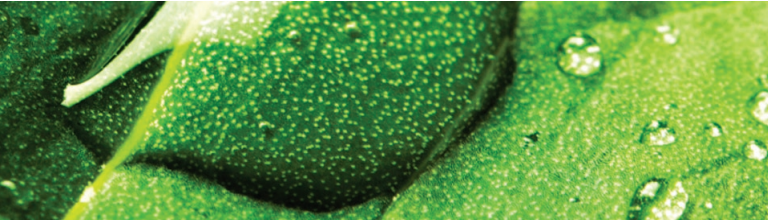

art of combustion, heat recovery, process control, and plant operations, making CPL the cost-effective single-source solution for your industrial sustainability needs.

Lower Emissions

In 2010, CPL joined with Jerry Lang Combustion Consulting (JLCC) to offer a cost-effective way to reduce targeted emissions while avoiding large capital investments or operating cost increases. Lang and his associates have developed emissions reduction technology over the past twenty years and hold twelve apparatus patents. Working together, we customize solutions specific to your site and needs.

*Dedicated to the Art
of Performance*

Experience OUR Experience

We are honored to have partnered with an exceptional list of customers over the years, including Frito-Lay, Exxon, Hershey, Kellogg, DuPont, NASA, Tyson's, Chevron, Republic Services, Lockheed Martin, and Waste Management.

Find out why these companies and many others have adopted OUR[®] Technology to lower their energy requirements and improve their sustainability. And learn how we can help you do the same.
